

WOOD 00

Description

A dense curtain fabric with a soft drape, made from Tencel™-Lyocell and Linen. Lyocell is the sustainable alternative for viscose, a yarn made from wood pulp sourced from specially managed forests. A closed loop production process ensures that no chemicals are released. In combination with linen this results in a 100% natural fabric that is fully biodegradable. The Lyocell gives Wood a subtle sheen and a soft touch, and in combination with the scattered linen slubs this creates a curtain fabric with an elegant look.

Specifications

Part ID	0105260000
Composition	75% lyocell, 25% linen
Width (cm)	300 cm
Weight (g/m1)	498 g/m1
Lightfasness (scale 1-8)	4
Certifications	OEKOTEX
Color variants	7
Shrinkage (%)	2%
Roman blind suitable	Yes

Washing instructions

Industrial washing instructions

Does not apply.
